EPOXY SEALER 100

Epoxy Sealer 100 is a high-quality epoxy primer designed to prepare and seal surfaces before applying topcoats or self-leveling epoxies. It provides superior adhesion, moisture resistance, and helps create a strong base for the final flooring system.

Key Features:

- Excellent adhesion to concrete, wood, metal, and epoxy coatings
- Acts as a moisture barrier, preventing moisture-related issues
- Fast-drying for quick project completion
- Penetrates porous surfaces for improved performance

Applications:

- Concrete, metal, and wood surfaces
- Ideal for preparing industrial and commercial floors for topcoats

EPOXY FILLSEAL 150

Epoxy FillSeal 150 is a high-build, second primer that fills imperfections and provides additional sealing properties. This product is perfect for smoothing rough surfaces, ensuring a smooth and level base for the final epoxy application. It can be mixed with quartz to make a stronger surface

Key Features:

- High-build formula to fill cracks, holes, and surface irregularities
- Enhances bonding between layers
- Provides a smooth, level surface for topcoats
- Fast-drying for minimal downtime

EPOXY SELFLEVELING 500

Epoxy Selfleveling 500 is a high-performance, two-component epoxy coating system designed for industrial, commercial, and residential flooring applications. This self-leveling epoxy is ideal for creating smooth, seamless, and durable floors that resist chemicals, moisture, and heavy foot traffic.

Key Features:

- Self-leveling for a flawless finish
- Excellent chemical resistance
- High durability for high-traffic areas
- Smooth, seamless surface ideal for a wide range of environments

EPOXY COATINGS (GLOSSY AND MATTE)

Our Epoxy Coatings are available in both glossy and matte finishes, providing flexibility for different design preferences. These coatings offer superior protection, durability, and aesthetic appeal, making them ideal for both residential and commercial floors.

Key Features:

- Glossy finish for a sleek, high-shine look
- Matte finish for a subtle, modern appearance
- Long-lasting protection against wear and tear
- Easy to clean and maintain

Applications:

- Commercial showrooms, offices, and retail spaces
- Residential kitchens, bathrooms, and living areas
- High-traffic environments requiring a low-maintenance floor

POLYURETHANE UV SEALER

EDIFLOOR GROUP L.L.C

Polyurethane UV Sealer is a protective coating designed to shield epoxy floors from the damaging effects of UV light. It prevents fading, yellowing, and surface degradation, ensuring that your floors maintain their appearance over time.

Key Features:

- UV-resistant formula that prevents yellowing and fading
- Durable, high-performance protective layer
- Enhances the longevity of epoxy flooring
- Easy to apply and dries quickly

Applications:

- Outdoor floors and spaces exposed to sunlight
- Commercial areas with high UV exposure

REPOX 8132 FOR WOOD TABLES AND DECORATIONS

RepoX 8132 is a premium, high-performance epoxy resin specifically designed for use on wood surfaces, particularly wood tables and decorative items. This versatile product is perfect for creating a smooth, glossy finish that enhances the natural beauty of wood, while providing a protective coating that resists scratches, moisture, and wear.

Applications:

- **Wood Tables:** Ideal for creating a durable, glossy surface on wooden tables, both for residential and commercial use.
- **Decorative Wood Items:** Perfect for custom wood decorations, such as wall art, trays, or furniture pieces, where the natural beauty of the wood needs to be accentuated.
- **Countertops and Bars:** Provides a high-gloss, protective layer for wooden countertops, making them both visually stunning and resistant to wear and tear.
- **Wooden Coasters and Serving Trays:** Great for crafting decorative wooden items like coasters, serving trays, or frames, providing a protective and aesthetically appealing coating.
